- ✓ Exceptional hold - up to 12h
- ✓ Fix & Go !

### Advanced zinc-free formula

Through its innovative zinc-free formula, this premium denture adhesive cream provides a strong long lasting hold for up to 12 hours. By reacting with moisture in the mouth, the cream creates a comfortable seal between your dentures and your gums, thus preventing food particles from getting lodged between them.

The formula has a neutral taste and helps ensure that your dentures stay odour-free. It's ease of use and proven results will allow you to once again, eat, drink and smile with confidence.
